# We'll spend £40k on technology

ADULTS will spend around £40,000 on technology in their lifetime.

This will include 21 mobile phones, 16 games consoles, 16 laptops or computers and 126 charging cables.

On average they will also buy 13 TVs, 16 tablets and 13 cameras, not forgetting 21 pairs of headphones and 16 sets of speakers, says a study.

The research, from online marketplace musicMagpie, found a fifth of adults will bin their technology once

they have finished with it, even if it is still in working order. It also emerged the average adult could make more than £2,000 from trading in used technology from their home.

Liam Howley, from musicMagpie, said: "People will own a staggering amount of tech in their lifetime, much of which lies dormant in households.

"With people encouraged to stay at home, this is a good opportunity to have a rummage in those drawers."

# 8 **SELL STUFF YOU NO LONGER NEED**

Have a full-blown clear-out of all the stuff you no longer use and stick it on eBay or, for tech stuff, try [musicmagpie.co.uk](http://musicmagpie.co.uk).

Just because something may no longer be of any use to you doesn't mean it's worthless – others may be prepared to pay for it.

It's a winner on two fronts as your house will be less cluttered and your bank account will look a bit healthier.

# £40,000 bill for 21 phones and 16 tablets

BRITS will spend £40,000 on tech devices in their life.

On average they will use 21 phones, 16 games consoles, 16 laptops, 16 tablets, 13 TVs, 21 headphones and 16 speakers.

But website music-Magpie found a fifth of adults dump gadgets in good working order when a newer version comes out.

The average trade-in value of a family's unused devices is £2,094.77.

Liam Howley of music-Magpie said: "By trading in people ensure [it] is refurbished for the next person."

Average trade-in for a mobile phone is £150, £347 for an Apple computer, £131 for a tablet and £46 for a games console.

# TECH FOR LIFE £40K

THE typical adult will spend around £40,000 on tech during a lifetime.

This will include 21 mobile phones, 16 games consoles and 16 computers – along with more than 1,000 batteries and 126 charging cables.

They will also buy 13 TVs, 16 tablets and 13 cameras – plus 21 headphones

and 16 speaker sets, research for buying and selling site musicMagpie says.

Almost a fifth will bin tech once they have finished with it – even if it works.

Yet people could typically make over £2,000 from trading in all their gadgets.

Spokesman Liam Howley said: “This is a good opportunity for a clearout.”
